

The MGM Advantage

MGM is an American Owned and Operated Business

Product Quality

45 years of transformer manufacturing and design experience with ISO 9001-2015 certified facilities

Local Stock & Representation

- Strategic manufacturer sales reps located throughout the US, Canada, and Mexico
- 18 stocking warehouse locations
- Same day delivery/pickup; Next day delivery

Lead Times

- Industry's best quotation turnaround time typically within 24 - 48 hours
- Industry's best production lead times on custom transformers and medium voltage units

Customer Service

- Fast, responsive, and friendly customer service staff
- Knowledgeable inside sales engineers ready to assist

Product Offerings

1 600V Dry Type

- Ventilated - General Purpose
- Stocked
- Made-To-Order
- From 10 - 1500KVA

2 Medium Voltage - Dry

- Dry Type Substation Transformers
- Made-To-Order
- From 10 - 10,000KVA
- Up to 35kV Class

3 Medium Voltage - Liquid

- Oil-filled Substation Transformers
- Made-To-Order
- From 10 - 10,000KVA
- Up to 35kV Class

4 Special Applications

- Drive Isolation, Traction, Mining, Harmonic Mitigating, Auto
- Made-To-Order up to 10MVA, 35kV

5 Buck Boost / Encapsulated

- Resin encapsulated transformers used to correct off-standard voltages
- 100 standard SKUs from 0.05 - 25KVA

Programs

MGM complies with all Made In USA Statutes

- Made In USA
- Buy America/Buy American
- ARRA
- BAA
- SPPA

Bull Rush program can expedite production lead time to as fast as 2 days!

- 5, 10, 15 day standard Bull Rush options

Distributor Gold Pass

- Elite partnership program
- Special price agreement
- Annual rebate program
- and more

MGM Transformer Company was established in 1975

MGM started as a dry-type manufacturer in 1975 but quickly introduced liquid units to its product line in 1982. By 1990, MGM Transformer had grown to become the largest independent transformer manufacturer west of the Mississippi.

Into the early 90's MGM operated solely out of its facility in Los Angeles, California but in 1991, to expand its product portfolio, MGM Transformer Company opened a 120k sqft facility in Tijuana, MX. This allowed MGM to produce Low Voltage units in Mexico, and focus it's U.S. operations on the more complicated Medium Voltage units.

In recent decades, there has been significant growth in transformers for specialty applications as the electrical infrastructure changes and users have looked for ways to improve efficiencies to reduce power costs. MGM Transformer Company has responded by building an engineering staff that specializes in the application and design of these sophisticated systems with designs for Drive Isolation, Traction Duty, Grounding, Mining, and High Rise transformers applications.

Headquarter & Plant

5701 Smithway St.
Commerce, CA 90040
